

Faculty Evaluation

Jay Wortman (Carbohydrate Intake and Diabetes)

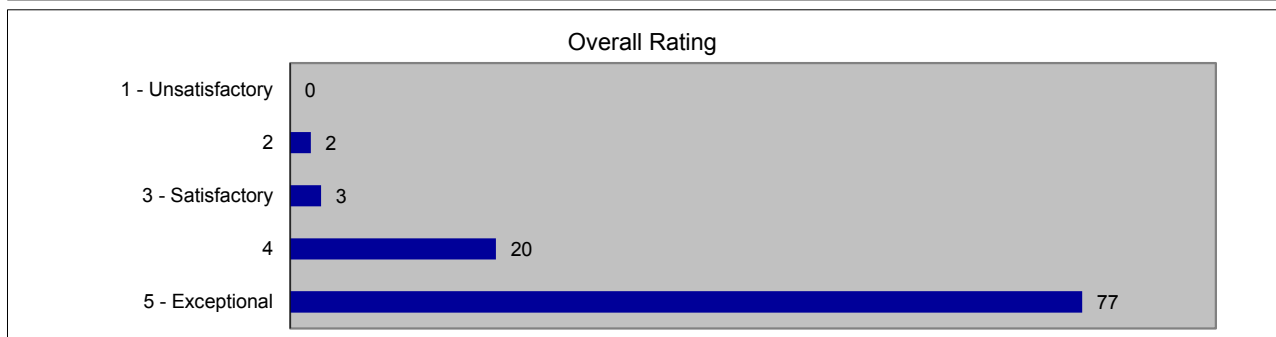

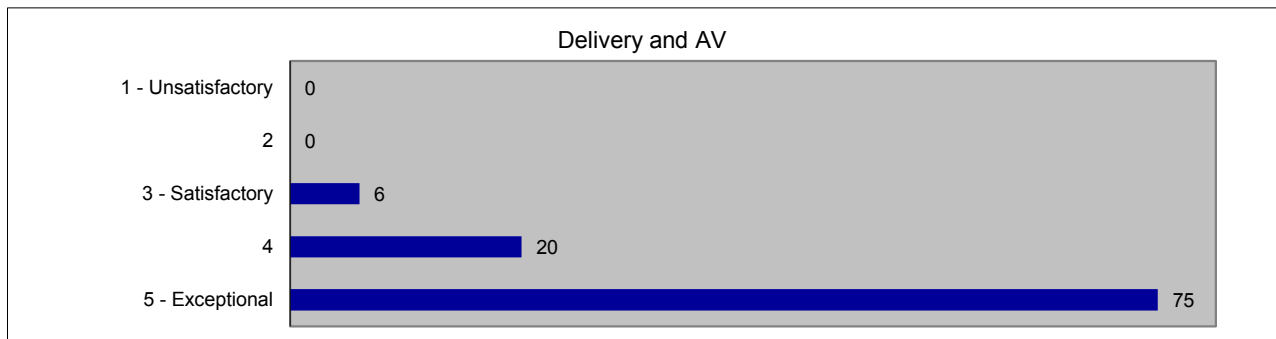

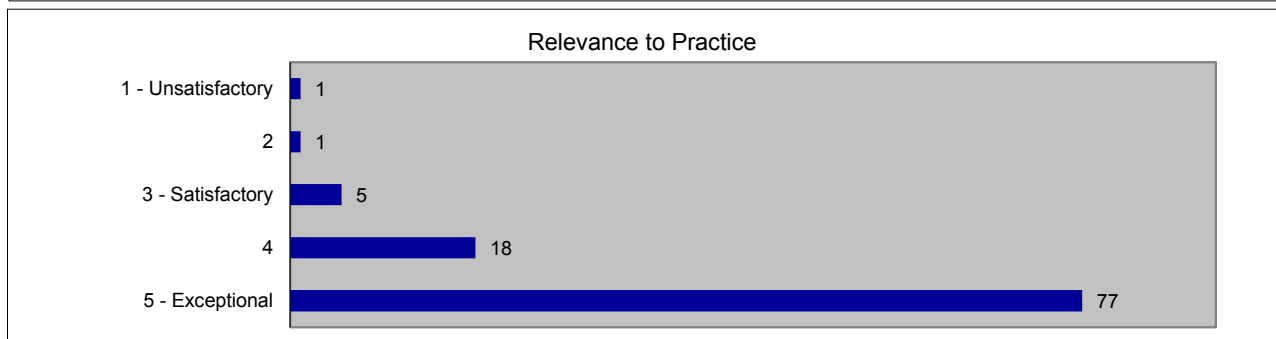

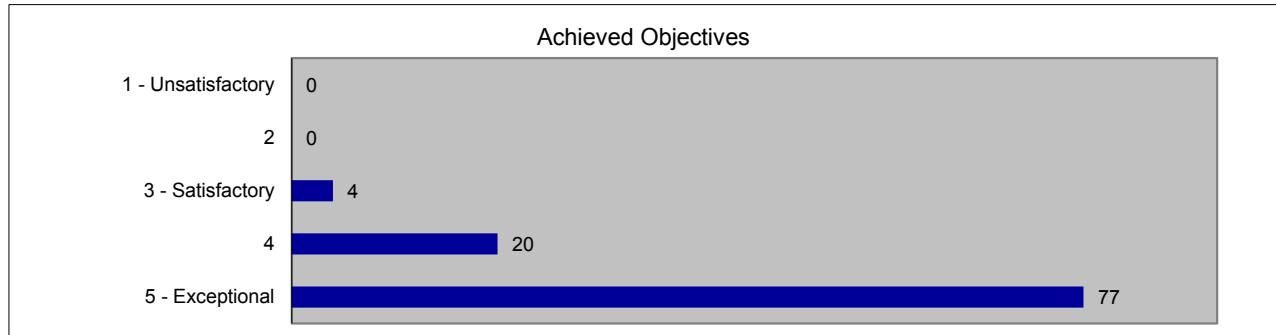

Speaker Average: 4.69

Speaker Averages:

Range: 3.62 - 4.69

Mean: 4.32

Median: 4.46

Comments:

Very well said; very informative

Amazing lecture: thank you

Amazing lecturer

Wow - superb and practical: The Best

We need more active thinkers like this person

Stimulating : we need more of the same

How about part II (i.e., Practical Aspects...)?

Very useful content -- talks too fast and slides should have a 1 line-home message noted for later reinforcement

Very good

Started, towards end, to be a bit longwinded

Hope controversial aspects addressed by other speakers

Most useful

Excellent. Fastpaced but clear

Excellent. Paradigm shift -- Get him back to give practical implementation of diet for healthy change

Excellent

This is a huge impact talk -- outstanding

I look forward to hearing Dr. Wortman again next year or sooner! His talk is essential because it covers the area and ideas of medicine that is ignored because of funding

Absolutely excellent and NEW approach. Perhaps another talk next year about the specifics of a low carb diet, how to start, monitor, etc...

I remain skeptical of paranoid preachers

Very interesting talk

Made me think

Superb talk -- well given and informative

Stimulated most discussion at conference

Excellent talk. Great speaker. Too much to cover in 1 talk only. Needs TWO slots: Sat and Sun, to properly discuss

Need to hear from him for Annual updates

Excellent

Very thought-provoking

Great talk

Good talk

Gives me more questions than it answers

Perhaps this is the holy grail

Would be great to have large well done RCT to further support this diet espec. CVS locations. Shows a lot of promise

More info needed on what exactly a low-CHO diet entails

High eval of the conference

Provocative... more discussion needed

Could have panel: both sides of debate

Stimulating. Can one say "food for thought"?

One of the most important (and interesting) lectures of the seminar. I don't agree with everything he said, but it is NB

Fantastic

Profound! Great talk. Put the money here (fast), not into bureaucratic surgery

The best presentation

Very informative

Excellent

Excellent and very thought provoking
